PRE WEDDING PLANNING

One of the things I love about my job is getting to witness so many weddings, and I've picked up a few ideas from some of the best weddings I've worked on. I'm here to help you shape a day that not only runs smoothly but also allows time for beautiful, natural photography without it ever feeling like a photoshoot.

To make sure we're always on the same page, every package includes three 30-minute planning consultations. I recommend one at the start when we first connect, another midway through once you've got a few vendors locked in, and a final one a few weeks out to fine-tune the timeline and any last little details.
